Mixing

Thoroughly stir both A and B components prior to mixing together.

Mixing by hand

Combine equal parts of A and B component by weight and stir until completely mixed. Use care when mixing to minimize air entrapment.

Mixing and dispensing with automatic equipment

Use properly ratioed equipment for a 1:1 mix ratio. Also use a mixing system that will properly mix A and B components. Once mixed properly the material will have a pot-life of > 30 minutes

Storage and Shelf Life

QSil 550R should be stored in the original unopened container at 25C (77F). It will remain useful for a period of 12 months if stored under those conditions.
